

CLIP PRODUCTION LINE

Our cost-effective Clip Production Line offers you a continuous, reliable way to produce "single clip", as defined in TS/EN 8745 standard.

The pneumatic feeder draws the tape raw material from its pay-off and feeds to the press with precise increments. The cutting die attached to the press, cuts and bends the raw material and forms a clip; where it also separates the scrap.

Meet our ease-of-use, reliable, cost-effective and long-lasting Clip Production Line and enhance your productivity!

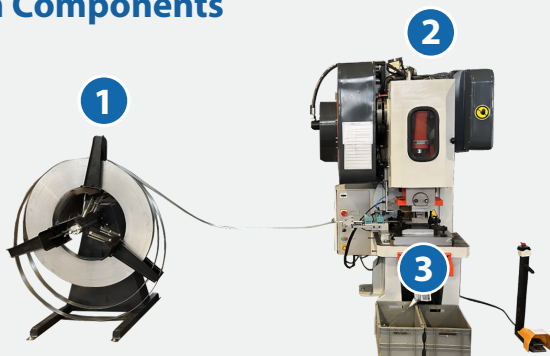

Features

- Ease-of-Use: Control entire production line from a single control interface.
- Low Maintenance: Simplicity of the line requires minimum maintenance.
- Clip Type: "Single Clip" as defined in TS/EN 8745 standard.

Capabilities

- Production Capacity: 3600 clips/h or 10.5 kg/h
- Total Weight: 3000 kg (Full line)
- Dimensions: L: 3.8, W: 1.7, H:2 m (Full line dimensions)

System Components

1. Tape (Sheet Metal) Pay-Off
2. High-Speed Press, equipped with Pneumatic-Feeder
3. Press (Cutting) Die
